YARN TRADE INDEX

In this department will be found classified lists of spinners of different kinds of yarn, who sell their product. So far as possible the sizes of yarn which are made are given, and the form in which the yarn is put up. Dealers and commission merchants are not included in this list. There is a separate list following the list of yarn manufacturers in which are included such firms.

The publishers will be pleased to receive notice of any corrections that should

be made.

If any kinds of yarn are wanted which are not found in these classified lists, the publishers can probably supply the addresses of manufacturers or dealers from whom they can be obtained.

THE PACEMAKER

TRACE back the history of silk manufacture in this country for three-quarters of a century and you will find one name always conspicuous—CHENEY.

Not merely pioneers, but the pacemakers of silk manufacturing in this country—that is CHENEY. It is a leadership maintained through constant, patient effort, through ceaseless experiment, research and invention, through the introduction of high standards into a business founded on a beautiful product.

Small wonder that this leadership has proved so successful in producing under the name of **CHENEY** a line of silks and silk products in which one can place utmost reliance.

Textile Clearing House

Mill men instinctively go to the Textile Clearing House for

- 1. THE QUICK DISPOSAL OF USED MA-CHINERY, ODD YARN, DYESTUFFS, MILL SUPPLIES, AND MILL PROP-ERTY.
- 2. LOCATING ANY OF THE ABOVE WHICH THEY MAY NEED AND WANT TO PURCHASE.
- 3. FINDING THE RIGHT MEN FOR JOBS AND THE RIGHT JOBS FOR MEN.
- 4. BUSINESS OPPORTUNITIES OF ALL KINDS IN THE TEXTILE LINE.

The Textile Clearing House is the classified advertising section of TEXTILE WORLD JOURNAL, the world's foremost textile paper, published weekly. The advertising rates are so low for the Textile Clearing House that you can afford to use it for most every requirement. Thousands of mill men who use the Clearing House say it is an indispensable institution of the textile industry.

The "Allen Worcester"

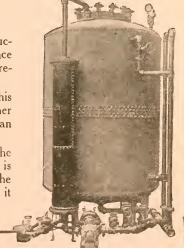

the Latest of a Line of Successful Kiers

-and the best, because in its construction we have utilized the experience gained in the manufacture of its predecessors.

One of the distinctive features of this Kier is an improved pump driven either by motor or steam, which furnishes an even and rapid circulation.

As no live steam is admitted to the Kier, the strength of the liquor is uniform throughout the boil. "Worcester" is strong and durable: it saves labor, fuel and chemicals.

We also make Hydraulic Kiers for raw stock, Caustic Mixing Tanks, Steam Boxes, etc.

Have You Ever Stopped to Consider What Tangles and Tears Your Skein Yarn;

what causes so much waste; why there is so much trouble in your winding, and so many knots in your yarn? Have you ever examined your dye sticks, dry poles and your trucks, to see if your sticks are smooth, and that your trucks have no places for yarn to catch on and tear the skein? It would pay you to go over these things once in a while. This would save burling and mending, and would help your production in the loom.

FRANKBAILLY CEDAR BROOK
CAMPDEN COUNTY

I am now supplying over 700 mills and dye houses in U. S. and Canada with DYE STICKS, drying and sulphur house poles, wringing sticks, trucks for dry rooms, dye houses and mill purposes. My trucks have self-oiling wheels. They are smooth. Yarn will not catch on them. They are properly balanced. I build any truck required.

Let me know what you need. Give me a chance to demonstrate my goods.

ALPHABETICAL INDEX

The Textile Establishments

OF THE UNITED STATES AND CANADA

* Indicates new establishments.

† Indicates change in name or old establishment taken over by another concern.

The following index is an alphabetical arrangement of all the textile establishments in United States. Following the name and address of the establishment, the character of the United States. the mill is designated by letters, thus;

(C) means a cotton mill

(W) means a woolen mill (S) means a silk mill

(Bl) means a bleachery

(K) means a knitting mill (F) means a finishing establishment (J) means a jute mill (A) means a sbestos

The number which follows indicates the page upon which the full particulars of the mill

It frequently happens that an establishment is listed under two names, viz.; proprietor's or company's name and also the name of the mill, as for example, Wm. F. Reed & Sons Co., Victoria Mill, Philadelphia, Pa. In the alphabetical index this is listed as follows; Wm. F. Reed & Sons Co., Philadelphia, Pa., also Victoria Mill (Wm. F. Reed & Sons Co.), the page number being given in both instances, but in the case of the second name the address is not given, so that if this index is used for addressing purposes, no duplicates will be made if directed only to the names which have addresses.

As the body of the directory is arranged alphabetically by states, towns and establishments it is, therefore, self-indexing, and any mill can be readily found through one or the other system of classification, viz.: by its name in the alphabetical index, or by its location in the body of the book, where full particulars about each mill will be found.
